Colgan Air Flight 3407 - Wikipedia

The piece of the fuselage blown off the aircraft was never found. Investigation by the United States National Transportation Safety Board (NTSB) concluded that the accident was caused by metal fatigue exacerbated by crevice corrosion. The aircraft was 19 years old and operated in a coastal environment, with exposure to salt and humidity.

Aloha Airlines Flight 243 - Wikipedia

The final investigation report found that the accident was the result of fatigue cracking caused by inadequate maintenance after a much earlier tailstrike incident. On 7 February 1980, the aircraft was flying from Stockholm Arlanda Airport to Taoyuan International Airport via King Abdulaziz International Airport and Kai Tak International Airport as China Airlines Flight 009.
