Daikin's VRV IV systems integrate advanced technology to provide comfort control with maximum energy efficiency and reliabilty. Currently available in heat pump and heat recovery configurations, VRV IV provides a solution for multi-family residential to large commercial applications desiring heating or cooling.

In 1969, under the Daikin brand, the first split-system appeared. The energy crisis also stimulated Daikin's development of air-conditioning technologies for large buildings. As a result, systems have appeared that have had variable refrigerant flow (VRV). At the beginning of this century, they were modernized so that the refrigerants in them did not threaten the ozone layer of the planet.
