The damper plate is the likely cause of the annoying gear clatter on the ZF Hurth transmission, especially at idle power, on the Catalina 34 and 36, and other sailboats.

ZF Hurth Damper Clatter

This plate absorbs the engine's firing impulses, is the last

Access Free Hurth Transmission Engine

link between the engine and transmission, and connects directly to the transmission's input splines. With a bad drive plate, even the slightest variation in firing impulses from the engine can cause transmission noise.

Products - ZF

A key part of the automotive transmission's function is providing initial slip between your car's engine and wheels so that your engine doesn't stall as it tries to get your car moving. It does this either via a foot-operated clutch (manual transmission) or a torque converter (automatic transmission).

Everything You Need to Know About Your Boat's Transmission

...

ZF - HURTH
transmission in my 346
Carver - knocking
sound when idling in
gear, at 1200 rpms -
quiet - at 3000 rpms
same sound and motor
starts to lose power.
My question is could
the transmission be
causing the loss of
power to the engine or
do I have 2 problems.
