primary care visits relative to the control group (+43% vs +4%,  $P < 0.001$ ). This was accompanied by a reduction in urgent care visits by the intervention group compared with the control group (-43% vs -5%,  $P < 0.001$ ). There were no differences in the other types of visits, and the total visit costs for the ...

### **The impact of improving access to primary care**

While coverage alone doesn't guarantee access, it is an essential first step. Improving access to health care means taking a broad approach that includes these five steps. Ensure adequate funding of the Children's Health Insurance Program and retain Medicaid expansion and implement expansion in more states.

becomes wellness. This is certainly true for many low-income and elderly people who need help getting to vital care.

## **10 Ways Hospitals Can Improve Healthcare Access**

Andersen discusses four concepts within access that can be viewed through the conceptual framework. Potential access is the presence of enabling resources, allowing the individual to seek care if needed. Realized access is the actual use of care, shown as the outcome of interest in the earlier models.
