Data Query Language (DQL) - Oracle Database Ajax & PHP Web ...

Create the PHP script that queries the Oracle database. Manually test the PHP script to see how it works. Write the JavaScript code that interacts with the PHP script. Make the HTML form that ties into the JavaScript. Test the entire process. Step 1: Programming the Database Query. The entire PHP script is called ajax.php. (See sample code zip.) The purpose of this script is to run a query in Oracle and print a message based upon the results of the query.

Creating an Ajax Process Using PHP and Oracle

Overview. PHP is a popular web scripting language, and is often used to create database-driven web sites. This tutorial helps you get started with PHP and Oracle Database by showing how to build a web application and by giving techniques for using PHP with Oracle. If you are new to PHP, review the Appendix: PHP Primerto gain an understanding of the PHP language.

Using PHP with Oracle Database 11g
