The symptoms of post-traumatic stress disorder have been recorded for millennia, but it took more than a century for physicians to classify it as a disorder with a specific treatment.

How PTSD went from 'shell-shock' to a recognized medical ...

As the work of Harrington and Loughran suggests, it is important to ask whether the preoccupation with present-day psychiatric thinking—symbolised by the representations of shell shock, and a teleological interest in PTSD—has skewed the historical gaze, privileging clear-cut traumatic disorders over those with ambiguous aetiologies, whilst encouraging an intense focus on military traumata to the relative neglect of disorders like whiplash and accident neurosis, or of rape trauma ...
