SOLAR SOUND SYSTEM + Pluto. HD - YouTube

The eight planets of the solar system and Pluto, in a montage of images scaled to show the approximate sizes of the bodies relative to one another. Outward from the Sun, which is represented to scale by the yellow segment at the extreme left, are the four rocky terrestrial planets (Mercury, Venus, Earth, and Mars), the four hydrogen-rich giant planets (Jupiter, Saturn, Uranus, and Neptune), and icy, comparatively tiny Pluto.

solar system | Definition, Planets, & Facts | Britannica

The orbit of Pluto is inclined relative to the plane of the solar system by 17 degrees—far larger than the inclination of any planet. 8 Also, its orbit has high eccentricity (the “squashed-ness” of the ellipse). Pluto is 1.79 billion miles closer to the sun at its closest approach (perihelion) than at its most distant point (aphelion).

The Solar System: Pluto | The Institute for Creation Research

Discovered in 1930, Pluto was long considered our solar system's ninth planet. But after the discovery that many similar, intriguing worlds inhabit the distant region beyond Neptune known as the Kuiper Belt, icy Pluto was reclassified as a dwarf planet. Pluto is named after the Roman god of the underworld.

Pluto Poster - Version A | NASA Solar System Exploration

The Segmentum Solar is the vast region of Imperial space centred on Terra and the Sol System. The Imperial Navy shipyards for the Segmentum are located on Luna, and the Imperial Navy headquarters in the Segmentum is based within Mars' Ring of Iron. The Segmentum Solar is the central hub of the Imperium of Man and the most ancient and densely settled region of human space.

Segmentum Solar | Warhammer 40k Wiki | Fandom

Pluto is actually closer to the sun than Neptune for about 8% of its orbit. Pluto is just one of many icy objects in a distant area of our solar system. Pluto and its large, orbiting companion object Charon, are tipped on their sides. All of the above. Well, just pick the answer you like best, because they are all true!
