Market timing is the strategy of making buying or selling decisions of financial assets (often stocks) by attempting to predict future market price movements. The prediction may be based on an outlook of market or economic conditions resulting from technical or fundamental analysis.

Market timing - Wikipedia

There are times when you are day trading that the time zones for the day have no relevance. This is when the volume on a stock spikes outside of the morning timeframe at some random time. For example, if a stock has a significant spike at 12:34 pm, traders will take notice.
